

Application No. 09/964,065

Reply to Office Action

*REMARKS/ARGUMENTS*

The claims have been amended to point out more particularly and claim more distinctly the present invention. In particular, claims 53 and 63 have been amended to recite that there is no overlap between the cellular genome and the adenoviral genome that mediates a recombination event between the cellular genome and the adenoviral genome resulting in a replication-competent adenoviral vector. This amendment is supported by the specification at, for example, page 14, lines 8-17. Accordingly, no new matter has been added by way of the amendments to claims 53 and 63. Applicants respectfully submit that the patent application is in condition for allowance. If, in the opinion of the Examiner, a telephone conference would expedite the prosecution of the subject application, the Examiner is invited to call the undersigned agent.

Respectfully submitted,

Melissa E. Kolom, Reg. No. 51,860
